GC6-7D

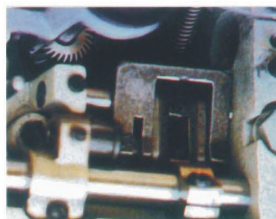

SINGLE NEEDLE WALKING FOOT COMPOUND FEED MACHINE

Model GC6-7-D high speed medium and heavy material combine feed sewing machines are the products higher than the model GC6-7 for its new design. The method to feed is the synchronized feed of walking presser foot, needle and feed god. They have the advantages of it's original products and improve the feed mechanism, increase the automatic lubrication device. Sewing performance are better. They are widely used in the factories if suitcase, tarpaulin, cushion, leather goods.

Three synchronized combined feed mechanism can avoid the slipping between sewing materials.

The using of the lever feed mechanism ensure accordance in high or low speed sewing and gain the excellent sewing result.

The using of the big rotating hook reduce to exchange bobbin thread, improve sewing efficiency and increase the lives.

Max sewing speed	Stitch length	presser foot lift	Max sewing thickness	Needle	Rotating hook	Stroke of needle, presser foot, feeddog	Motor power
3000spm	0~8mm	6.5mm(13mm when knee controlled)	8mm(8 layers man made leathers)	GR2-220#-24#	automatic lubrication Rotating hook	0~8mm	0.37KW(used for sewing machine only)
